Project Design Phase-II Technology Stack (Architecture & Stack)

Date	09 October 2022	
Team ID	PNT2022TMID06853	
Project Name	Real-Time Communication System Powered by Al for Specially Abled	
Maximum Marks	4 Marks	

Technical Architecture:

The Deliverable shall include the architectural diagram as below and the information as per the table1 & table 2

Guidelines:

- 1. Collecting key points from mediapipe holistic and collect a buch of data from keypoints.
- 2. Build and Train the LSTM(Long Short Term Memory model)
- 3. API like Google Speech, Amazon API or any other third party API is used to convert text into Speech 4. The Model is integrated into the Web UI by the developer (Admin)
- 5. The model is finalized and it will continue the testing.
- 6. Speech Recognistion of the model to the user.

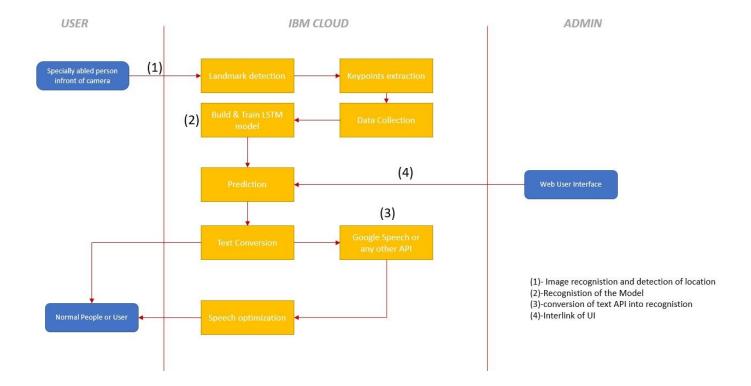

Table-1 : Components & Technologies:

S.No	Component	Description	Technology	
1.	User Interface	Web User Interface	Flask	
2.	Application Logic-1	We start by collecting key points from mediapipe holistic and collect a bunch of data from keypoints We then build a LSTM(Long Short term Memory) model and train with our stored data which helps us to detect action with a number of frames. Once training is done, we can use this model for real time hand gesture detection and simultaneously convert the gesture to speech using OpenCV.	Python	
3.	External API-1 Convert text into Speech		Google Speech ApI or any other API	
4.	Machine Learning Model	This Model predict recognise the sign language	gn language Sign language recognistion model.	
5.	Infrastructure (Server / Cloud)	Application Deployment on Local System / Cloud Local Server Configuration: Cloud Server Configuration:	Local, Cloud Foundry, Kubernetes, etc.	

Table-2: Application Characteristics:

S.No	Characteristics	Description	Technology	
1.	Open-Source Frameworks	Used to Data visualizaton	Python,Jupyter	
2.	Scalable Architecture	Client Layer – The client web interface Data Layer – Database storage and Processing	HTML,Python,CSS,IBM Cloud	
3.	Availability	Use of IBM Cloud	IBM Cloud	
4.	4. Performance Accurate prediction of signs,Less		No Techology used
